CAREER OBJECT

Enthusiastic Computer Science fresher with strong foundational knowledge in C#, Java, SQL, and backend development concepts. Built hands-on projects using Java (MVC architecture) and Maven, along with basic understanding of Git and DevOps practices. Eager to contribute as a .NET Backend Developer, leverage my C# skills on real-world .NET projects, and deliver efficient, scalable solutions through hands-on learning in a collaborative team environment.

EDUCATION

Malla Reddy University ,Hyderabad **2022-2026**
Bachelor of Technology CSE **CGPA-8.2**

TECHNECAL SKILLS

- **Languages:** Python, SQL,Java
- **Frameworks:** Pandas, NumPy, Matplotlib,Spring-boot,.Net,React
- **Data Visualization:** Power BI, Excel, PowerPoint, Tableau
- **Data Cleaning:** Handling missing values, Removing duplicates, Data preprocessing
- **Platforms:** PyCharm, Jupyter Notebook, Visual Studio Code

PROJECTS

Collaborative React Dev Platform (Personal Project)

- Developed a full-stack collaborative development platform inspired by GitLab, combining social networking with real-time coding tools.
- Enabled users to build and collaborate on React projects in containerized environments powered by Docker, featuring Vite + React setup.

GreenPool – Smart Ride Pooling Web Application (Final Year Project)

- Developing a full-stack web-based carpooling platform to connect drivers and passengers in real time, aimed at reducing traffic congestion, fuel costs, and promoting eco-friendly commuting.
- Implemented user authentication, ride offering/searching, booking system, and rating/review features using Java technologies.
- Followed MVC architecture for clean separation of concerns and maintainable code.
- Currently enhancing features like improved location-based search, notification system, and admin dashboard.

SOFT SKILLS

- Problem solving
- Communication
- People Management
- Active Listening
- Leadership

CERTIFICATES

- Flutter from Udemy
- .Net from Udemy
- AWS certificate from TalentTrek
